

Relax Rotary Drum Washer

VASUDEV ENGINEERING

Quality That's Deliver

Relax Rotary Drum Washer

"VASUDEV" To meet the demands of clients and procure them the finest performing wares is our motto and this drives us to bring some of the finest machines for our clients. We are proudly presenting Relax Drum Machine especially developed shrinking process for bulkiness and gouge effect on synthetics fabric. Relax Drum Machine process like sizing, scouring & creasing, process can be done in high temperature high process. Fabric is loading from front door in side specially developed octagonal basket and that basket rotating forward & reserve direction with the help of inverter. Which has been designed specially to fulfill all the demands of modern industries. Relax Drum Machine offers new kind of technical advantages with regards to process time, energy consumption and fabric appearance.

GENERAL DESCRIPTION AND MAIN FEATURES

- Fabric Loading Capacity 200 Kgs up to 1000 Kgs.
- Pressure Vessel and all wet part of machine made of stainless steel AISI 304 L highly Corrosive resistance.
- Specially Developed Octagonal & Nonagon Perforated Basket 316 L.
- Machine make Single drive & Double drive.
- Also can drumming without bags.
- All spare easily available.
- Maximum working temperature 140°C
- Maximum working pressure 4 kg. / cm²
- All safety device required for a pressure vessel are incorporated with the machine.
- Heavy Duty Planetary gear box for basket rotating forward & reserve direction.
- Planetary Gear box direct couple for driven by frequency inverter control motor.
- Basket rotating forward & reserve direction with the help of double drive chain & chain wheel.
- Heavy duty base frame (Box type) for drum body.
